

Vitargo

ENDURANCE BAR

MADE FOR ATHLETES

“The Swedish Cereal Energy bar with creatine”

ENERGY BAR

- Vitargo
- Creatine
- Aminosyror
- Caffeine

The energy cereal bar with Vitargo/Creatine/Glutamine and Caffeine

This unique combination of carbohydrates, proteins, creatine and caffeine is a brilliant mix to maintain stamina and optimise your performance during sports. Vitargo® is a patented carbohydrate (starch), with unique properties, specially formulated for elite athletes to give an effective loading of easily accessible muscle energy (glycogen) in the body. Vitargo® has been clinically tested at the Karolinska Institute, Stockholm and compared with other “ordinary” sports carbohydrates. The results showed that Vitargo® was quicker in replenishing glycogen levels and passing through the stomach compared with other combinations of carbs. Read more about this at www.vitargo.com.

Increases performance and endurance

This bar is designed to give you the fuel your body prefer during sports. Of course it is very easy to chew. Vitargo® Endurance Bar helps you, by giving you Vitargo and 1g creatine/bar to buffer lactic acid levels in your muscles, to maintain the pace during the races. Caffeine, is known to help to burn fat to energy in the body, glutamine peptide is a high quality protein source that is used for muscle recovery and prevents overtraining.

How to use

Common use during exercise: Have a ½ Vitargo Endurance Bar 30 minutes along with water or sports drink (preferably a sugar free one like Vitargo®).

Team Sports, as soccer: ½ energy bar after warming up, ½ a bar for half time.

Cycling, Running, Endurance sports: Have a bite (piece), every 15-30 minutes or so, drink water or sports drink, like Vitargo®.

Alternate between Energikakan™ Energy Bar, and Vitargo® Endurance Bar.

As an in between meal: Have one Vitargo® Endurance bar as an in between meal, have it along with a fruit and a glass of water.
